Q2

1 patient residing at Fitzwilliam Unit (August) yielded a positive Clostridioides difficile result. An 'after action review' is underway and any learning will be included in the next months report. The patient has recovered and has been discharged home.

Learning from the After Action Review completed following the notification of a Clostridioides difficile toxin positive result yielded from a faecal sample sent from an in-patient residing on Fitzwilliam Ward, Malton Hospital (August 2024).

All care and the management received by the patient was in accordance with the local Trust C. difficile policy and NICE national prescribing algorithm.

The patient recovered and was discharged to place of residence

Environmental cleanliness noted to be good – mirrored in the domestic cleanliness audit results at the time of acquisition.

Positive feedback provided from the patient re the level of care received.

Inconsistencies were noted with the quality of documentation however. This is currently being addressed within the unit.

Exception Reporting and Operational Commentary

Safer Staffing Dashboard Narrative : Jan

17 units are flagging red for sickness in January, up from 16 in December. The number of units with sickness rates above 10% has increased to 10 from 8 in December with 3 units with a sickness rate above 15% (STaRS, Pine View and Granville Court).

There are no units with 5 red flags.

CHPPD is strong for most units however Westlands, MVC and Whitby inpatient unit are slightly below their target in December. 6 month averages for these units remain strong. Malton, as noted in previous months, continues to flag red for CHPPD but benchmark positively against model health system peers. The introduction of the revised Safe Nursing Care Tool (SNCT) during 2025 will support HTFT in determining an evidence based CHPPD on local acuity/dependency data.

Despite challenges with sickness, fill rates remain strong with the exception of MVL and TEC who are under the lower target threshold of 75% for RNs on days. TEC continue to have low bed occupancy (43%) and a strong CHPPD (31.3) and MVL CHPPD remains consistently above their CHPPD target. Pine view are under target for unregistered staff on days, however their RN fill rates exceed 100%, CHPPD is strong, and bed occupancy stands at 73%.

Mandatory training (all) is again above 85% for all units.

Whitby is below the lower threshold for BLS, however the resuscitation team have carried out ILS and BLS training at Whitby over two days in March so these figures will show an improvement in March's data. Westlands and MVC have recovered their position to above 80% for BLS. ILS compliance is above target for all unit with the exception of STaRS which remains under target for the third month, impacted by consistently high level of sickness (above 15%) and Maister Court has fallen below target in December.

Clinical supervision has to date remained consistently strong however there were a number of units with nil returns in December which has been escalated to the matrons.

The CHPPD RAG ratings are following discussions with and agreed by EMT in November 2022. Breakdowns are as follows:

Red RAG falls below the lowest rating, Green RAG is greater than the highest rating. Amber RAG falls between

Points of Note:

Complaints - Zero figures indicate at least one complaint was made but not upheld. Figures above zero indicate these complaints were either Upheld or Partly Upheld. These incur a Red flag.

Active Caseload - patients seen at least once for treatment within the team. ER Adult Teams do not have the local authority staffing numbers included.

No returns for clinical supervision will incur a Red Flag

FFT % results based on the number of responses received with a satisfactory outcome

Waiting Assessment - Total number of patients not seen for assessment
